## "Beau Geste"

With Ronald Colman, Alice Joyce, Neil Hamilton, Noah Beery, Mary Brian, William Powell, Norman Trevor, Ralph Forbes, Victor McLaglen.  
The Year's Greatest Melodrama

### ALSO TWO-REEL COMEDY

Mrs. I. W. Deman who has been spending the summer months with her daughter Mrs. Rend of Hood River, Ore., returned last week. Mrs. Deman visited her son Edward at Rose Budd and also her daughter Miss Alice Deman at Drumheller for a few days before returning home.

### LOCAL ITEMS

Mrs. Clauson returned from Calgary on Monday.

Mr. Matic is a Saskatoon visitor this week.

Archie Yates is a Drumheller visitor this week.

Bessie Bradley of Calgary is a Chinook visitor this week.

The Wheat Pool issued their first grain cheques today.

Mr. McDougal of Kilm is visiting at the home of his brother Jas. Young.

Mr. Percy Dohson of Calgary spent Friday and Saturday at the home of Fred Otto.

Mr. and Mrs. Huston of Youngstown visited at the home of F. Bassett on Sunday.

Mr. E. Proctor of Kelsey arrived here last week to look after his interests on the farm.

We understand that the stores in Chinook will be closed in the evening after next week.

Mr. and Mrs. Roberts and family of Kilm visited at the home of F. Bassett on Sunday.

Tramp, tramp, tramp, the boys are marching—home from the Laughlin dance.

Mr. and Mrs. C. W. Bassett and daughter Miss Letta are visiting at the home of their son Mr. F. Bassett.

Mr. J. R. Miller of Innisfail was a Chinook visitor this week. Mr. Miller's many friends were glad to see him again.

Mr. and Mrs. Holen returned from Drumheller on Sunday where they have been visiting their daughter Mrs. Lawson.

Mr. Goselaw who has been working for L. Ernest this summer left Wednesday for Saskatoon where he will spend the winter.

Clifford and Harry Thorpe of Calgary arrived in Chinook on Monday to attend school here. They will stay with their aunt Mrs. E. E. Jacques.

The hunters who left town on Tuesday have not returned yet. No doubt their load of game, etc. was too heavy to haul home through the snow.

There will be a dance at Peyton School on Friday, October 19th under the auspices of the "Prairie Rock" Club. Ladies please bring cake. Everybody body welcome.

All threshing operations are being held up owing to a rain on Monday night and on Tuesday night there was heavy snowfall which will make it impossible to do any threshing for at least a week. This week would have finished the threshing in the Chinook district had the fine weather continued that we had all through harvest. We have much to be thankful for having such good harvest weather.

At the Oyen School fair fourteen rural schools, Abbott, Kirkwall, Springburn, Exsel, North Exsel, Lawndale, Hills, Superior, Benton Valley, Blaire, Gowrie, Wavy Plain, Fair Acres, Nebalta and Glendale, and the four schools units at Oyen participated.

The outstanding feature was a parade in which the Dr. McPhail cup was won by Miss Gladys Walker's room, Oyen, and the second prize by Wavy Plain's school.

### A VISIT TO THE CHILDREN'S HOSPITAL

One of the "showplaces" of the capital City of Alberta undoubtedly the Red Cross Unit at the University Hospital, where the sick and crippled children are receiving the best surgical skill and nursing care.

First to attract attention is the fine spacious sun-porch with its huge glass windows and doorways to admit all the strong Alberta-sunshine that is possible.

Rows upon rows of little cots, many with the names of donors, are arranged within and the visitor stands amazed at the beauty and completeness of these up-to-date wards.

Flowers are everywhere with their message of cheer, and goodwill. Radio receiving sets, loud speakers, etc., tell of the kindly hearts that are ever planning for the comfort of the children.

The visitor pauses at the entrance while a student nurse comes forward with a white gown which must be worn while visiting the patients. The little nursery wards are right at the door and through the glass we see tiny babies with little pink toes poking out from their plaster casts. The diminutive cots in invariably draw forth admiration from women visitors, to whom the sight of a new baby with crooked limbs is a tragedy.

The young patients in the boys' and girls' wards come from the northern and central part of the province, and are found to be of many nationalities. An Indian girl and a negro lad are amongst

the many types seen here, each and all with a smile for the visitor and a word of hope that they will soon be well enough to get out of bed and walk.

The cures take a long and often tedious time, but the hospital days are filled with many interesting tasks such as weaving on a little bedside loom, articles of use and beauty, or making little boutiques of beads of many colours.

The Red Cross cordially invites the public to inspect their new unit at the University Hospital in Edmonton and see what service it is they are asked to support during the present campaign.

(Left Over From Last Week)

Cooley Bros. unloaded another carload of Ford cars on Tuesday.

P. Vandervott purchased a new Ford car this week.

Mrs. Lloyd Robinson entertained at a few tables of Bridge on Saturday evening. Mrs. Vandervott was the prize winner.

Mr. and Mrs. R. D. Lawson who have been spending a short vacation at Saskatoon visited at the home of the former's sister Mrs. P. Peterson on their return. Mr. and Mrs. K. Holen left on Tuesday in company with Mr. and Mrs. Lawson to visit them at Drumheller.

Mrs. C. E. Neff entertained a few ladies to afternoon tea on Tuesday afternoon in honor of Mrs. Margaret Neff and daughter Mrs. Moore, of Edmonton. Mrs. Neff, who has spent the summer months with her son Mr. Neff, returned to Edmonton on Tuesday accompanied by her daughter who also visited here for a few days. Mrs. Neff made a great many friends during her stay here.

## The Progress of Canada

Canada is forging steadily, even rapidly, to the front among the nations of the world. In all things material it is making great growth. Its trade, both domestic and foreign, is expanding as never before, and as a result every branch of industry is active. The country has just harvested one of the largest crops in its history; mining discoveries and operations are proceeding on an unprecedented scale; factories are working overtime, building operations in all provinces are reaching totals hitherto unrecorded, with the result that employment is general, wages good, and population increasing.

Important and gratifying as this material growth and prevailing prosperity is to our people, a much more vital matter to Canada is whether the Dominion is likewise making progress in those other directions which are essential to the upbuilding of a nation in the truest sense. Are the Canadian people becoming merely a nation of money-seekers, measuring their success in terms of dollars and statistics recording economic development and growth, or are they utilizing the larger advantages and increased power which material prosperity is conferring upon them to encourage and develop those arts and characteristics which stamp a people as truly advancing to greatness?

We believe signs generally point to the fact that the people of Canada are, taken as a whole, more intensely interested today in the spiritual, intellectual, moral growth of their country than at any previous period; that, in fact, the are deeply concerned, and very determined that the national ideals and character shall be maintained at a high level.

The widespread interest in and discussion of the subject of immigration is but one manifestation of this spirit. Considered solely from a material standpoint it would probably pay Canada to enormously increase its population just as rapidly as possible. Economically Canada would probably gain by absorption by the United States. But Canadians are insistent that quality rather than quantity shall be the governing factor in our immigration policy, and it would be hard to muster a corporal's guard of outstanding men who favor the policy of United States annexation.

Throughout Canada increasingly sympathetic attention is being given to the assimilation of the non-British peoples within our borders into the Canadian family. Here and there people may adopt an unfriendly and unfair attitude towards these people, and to that extent retard the good work, but they are exceptions to the generality of Canadians. More and more is it being realized that these people are making a real contribution to the national life of Canada, bringing to us music, poetry, traditions and handicrafts which are enriching this Dominion.

The increased attention being given to musical festivals and symphony orchestras, to the establishment of art galleries and museums, to scientific research, to literature and the rapidly increasing number of libraries, and to the steady improvement in Canadian magazines and publications of a better class, all go to prove that the people of Canada are not wholly materially minded.

The wonderful success which has attended the application of co-operative principles in the solution of production and marketing problems, and in the provision of public services for the use of all the people, is having its inevitable effect upon the minds of all people. To an ever increasing extent they are beginning to realize that if through loyal co-operation they can remedy material evils and advance their individual and corporate welfare, through the acceptance of the same principles and their application to all phases of community, provincial and national life they can greatly advance the welfare of the country as a whole.

Co-operation is better than competition or antagonism. Sympathetic consideration and helpful co-operation is better than hatred and the maintenance of bitter enmities. In the practical work of co-operation the Canadian people are learning that there are two sides to almost every question, that people who may differ with you are just as sincere as you are, that the road to ultimate success and the greatest good to the greatest number lies along the path of friendly compromise rather than in continual enmity and warfare.

Canada's progress is, therefore, a well balanced progress, and because of this gratifying fact the people of the Dominion may look to the future of this very gratifying fact the people of the Dominion may look with unbounded confidence to the future if their great country.

## A Railway Revolution

**Train in England Electrifies Line as It Travels**

A train which has puzzled many people has been running over a portion of the L.M.S. railway in England, says an article in "Answers." It looks like an electric train, and

the track over which it has made its journeys is not electrified.

Really, it is an "oil-electric" train, which electrifies the line as it goes along. Its engine-car contains a Diesel oil-engine, which drives generators to supply electric current to the motors. The whole equipment works so smoothly that there is a saving in labor costs, while the fuel used weighs only an eighth of that required for a steam locomotive.

Here is a real railway revolution. Already exhaustive tests have been made. In Canada, for instance, a Diesel electric train covered the distance between Montreal and Vancouver—2,937 miles—in 67 hours—beating a steam train by 38 hours. Another 334 miles run was accomplished at a speed, on the average, of over 60 miles an hour.

## Engineering Feat a Success

An engineering project, unique in Canadian industry, was declared a success at Fort Arthur, Ont., when tests were made of a pipeline by which ground pulp in flush form is carried from a grinding mill of the Thunder Bay Paper company, at Current River, to the paper mill two miles north. The tests were highly satisfactory, states the Thunder Bay management. The pipe is of cast iron, ten inches in diameter, and two miles long.

Wife (reading the paper)—"It says here that a London man boasts he has had an umbrella for 20 years." Her husband—"That's long enough. He ought to return it."

Headache? Relieve with Minard's Liniment.

## To Aid Farm Workers

**Clearing House to Furnish Winter Farm Employment May Be Established**

While no definite decision has been reached yet, a central clearing house, from which British miner-harvesters will be furnished winter employment may be located in Regina. The establishment of such a bureau, though not necessarily in this city, is expected to be the outcome of a conference held at the Parliament Buildings, Regina, on September 12, attended by representatives of the Federal and Provincial Departments of Colonization, those of the two great railways, the Government Labor Service and the United Farmers of Canada, Saskatchewan section.

## RHEUMATIC MISERY

**Relief Can Only Come Through Better Blood-Liniments of No Use**

In no other disease does the blood become thin so rapidly as in rheumatism. Not only does it become thin but it is loaded with impurities—rheumatic poisons. Without the proper treatment these poisons increase, the disease grows worse, until the patient becomes a cripple. Most treatments simply aim to keep down the pain, hence with every unfavorable condition a renewed attack follows. The best treatment is to cleanse the blood must be enriched and the rheumatic poisons driven out with the natural secretions of the body. This can best be done through a course of Dr. Williams' Plink Pills. These pills act directly on the blood, giving it new richness and redness. Those who have tried this treatment with beneficial results. That every sufferer from rheumatism will not be helped by Dr. Williams' Plink Pills is not the case. The most hopeful means of recovery is shown by the statement of Mr. David Carroll, Pictou, N. S., who says: "For years I was troubled with rheumatism. The pills were not comfortable, but they relieved pain, and kept getting worse. I tried so-called electric pills and many medicines, but did not get more temporary relief. Only the pills which have suffered from the trouble will help when I suffered at times. I had begun to despair of getting better when a friend urged me to try Dr. Williams' Plink Pills. In a short time I could feel this was a great improvement in my general health. It is not true that once you take Dr. Williams' Plink Pills I have not had the least twinge of the trouble in that time. That is why I confidently recommend the pills to others."

Kritik—Do you think you've improved "Richard III" much by writing it?

Playsmith—Sure. It was out of date. F'r instance, when Richard hollers, "A horse! A horse! My kingdom for a horse!" I have him shout, "A plane! A plane! My dictatorship for a plane!"

The Poor Man's Friend—Put up in small bottles that are easily procurable for forty cents apiece. Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is cut complete without it.

The Oil for the Farmer—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with cold and cramp, and for the mother who suffers from pains in the back, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

## Reward and Garnet, New Wheat Varieties, Now Holding Attention of Western Growers

Mr. L. H. Newman, Dominion Cerealist of the Experimental Farm, returned to the East recently from an extensive tour of Western Canada. During the trip practically every wheat growing area was visited. Mr. Newman states that the newer wheats, Reward and Garnet, are holding the attention of the western growers.

Some 467 farmers are this year testing Reward wheat. The variety is reported to have done well, though actual figures on yield, etc., have not yet been compiled. Mr. Newman stated that it had been impossible to determine anything definite with regard to this variety's rust resisting qualities because there was practically no rust in Manitoba and very little elsewhere. Conditions generally in the west Mr. Newman describes as distinctly above the average.

Particularly good are the reports on Garnet wheat, one of the originations of the Experimental Farm. Writing on the subject of this remarkable wheat early this year, the Dominion Cerealist stated "the history of Garnet wheat is almost an epic in the realm of scientific achievement. It reveals a story of almost half a century of patient but determined effort, replete with discouragements and disappointments but rewarded ultimately by definite and indisputable gains."

In 1914 Garnet wheat was included in the regular variety test-plots at the Experimental Farm. In 1919 it was tested at the Experimental Farms in the Prairie Provinces. In 1925 the branch farms were able to sow 320 acres, from which was produced about 9,700 bushels.

In 1926, some 6,954 bushels of Garnet seed were offered to prairie farmers, with a four-bushel limit. Some 2,826 farmers, including 682 soldier settlers, secured two to four bushels lots and thus together with seed from increasing test samples by two or three seed growers, made a grand total of some 14,000 bushels, or enough to seed 12,000 acres.

This year Garnet wheat was observed growing in all parts of the west. The section east of Prince Albert and north of Tisdale is practically a Garnet country. It is an early maturing variety, and produces a high proportion of grain to straw. This season serious frost in Saskatchewan on August 22 damaged the immature wheat, but Garnet demonstrated its ability to mature before the frost. It usually ripens a day or two before Ruby, from six to twelve days ahead of Marquis, and three or four days before Reward. This variety has also behaved well under drought conditions.

In 1903 it was reported wheat would never grow in the Peace River country. This year Garnet was being cut here on August 21. Crops were more advanced in the Peace River district than further south, and some of the west's finest crops were seen there. Dr. J. H. Grisdale, Deputy Minister of Agriculture, and Mr. L. H. Newman, driving through the Rio Grande section of the Peace River on August 22, were able to identify 31 varieties of wheat, and of these 16 were Garnet, 7 Marquis, 5 Huron, 1 Turkey Red, 1 Ruby and 1 Reward.

This indicates the way in which Garnet wheat is spreading in the west. As an early maturer and good yielder, it has no equal, and once more the Experimental Farm Branch of the Dominion Department of Agriculture must be credited with an epoch-making contribution to Canadian agriculture.

**Life Guard**—"How much can you carry?"

**Mere Man**—"Two hundred pounds."

**Life Guard**—"Suppose there was a woman out in the water drowning and she weighed four hundred pounds. How could you save her?"

**Mere Man**—"I'd make two trips."

### WEDDING OF SOCIAL PROMINENCE

Hon. Robert Forke, minister of immigration, has just announced the marriage of his daughter, Ethel May, to Charles J. McFarland, formerly of Los Angeles and now of Vancouver, the marriage having taken place in Vancouver recently.

### Winnipeg Newspaper Union

Looking Slender

An unusual one-piece dress, cleverly designed to make its wearer appear more slender, is a panel which appears to be cut apart to use contrasting fabrics or colors, as illustrated. A narrow belt, attached at either side of front panel, holds the fulness through the waistline. The ties are gathered at the back. The shaped collar is smart, finishing the flattering square neckline. Style No. 224 is designed in sizes 36, 38, 40, 42, 44, 46 and 48 inches bust, and if made of fine material only 1 1/2 yards of fabric is required. Printed and plain silk crepe, crepe satin using the two surfaces, printed and plain shantung, printed and plain linen, two tones in flat silk crepe, jersey, sheer wools or cotton-fabrics are the usual combinations. Pattern price 25 cents in stamps or coin (coin preferred).

We suggest enclosing 10 cents additional for a copy of our Fashion Magazine.

# Royal Yeast Cakes

STANDARD OF QUALITY FOR OVER 50 YEARS

MAKE BETTER HOME MADE BREAD

## WORLD HAPPENINGS BRIEFLY TOLD

One of the finest old churches in Moscow, the "Strasny Monastery," is being converted into an Anti-Russian museum.

Leon Vanderstyft, Belgian bicyclist, broke the world motorpace record for sustained speed when he rode 76½ miles in one hour.

A report is current in Bucharest that Poland, Roumania and Greece have concluded a military agreement to make a common front against Russia in the event of war.

Thousands of cattle have been drowned in the flood that came after the bursting of the Yser dykes in Holland and farmers estimate their damage at about \$25,000,000.

The Canadian Press was reliably informed that there is no reason to believe that the Duke and Duchess of York contemplate an early visit to Canada, as rumored in Ottawa.

T. Nichols, the Royal Canadian Mounted Police, Lethbridge, Alta., will receive the Imperial Service medal awarded by His Majesty the King, according to the Canadian Gazette.

Great Britain and the U. S. have continued for another year their agreement on administrative co-operation for the prevention of smuggling liquor into the United States by ships flying the British flag.

It was reported in League of Nations circles that the Irish Free State, following the example of Canada, is planning to establish legislation in Paris and appoint a minister to France.

The appointment of Jean Knight as French minister to Canada has been announced officially, confirming previous intimations that M. Knight would be sent to Ottawa as France's first diplomatic representative in the Dominion.

### Fine Shipment of Herefords

Rango Cattle From Alberta Bring Large Sum in Chicago

Ninety-three head of dry cows from the McIntyre ranch in Alberta were recently consigned to Chicago in exchange for a \$10,000 cheque. Cattlemen looking over the shipment claim that it is one of the finest lots of range cattle ever forwarded from Calgary. The heaviest animal in the lot tipped the scales at 1,700 pounds and the ninety-three averaged 1,350 lbs. These cattle come from one of the few remaining old-time ranches which is running a herd of upward of 5,000 Herefords.

Men's belts are used mostly for sports wear in Great Britain.

Ships that cannot afford wireless cannot afford crews.

### Protect Submarine Crews

Italian Has Invention That May Prove of Great Value

Cesar Borghetti, inventor of an apparatus for saving the lives of submarine crews in case of danger, has succeeded in interesting the Italian government in his invention and now gives the press some details of his amazing invention.

Signor Borghetti's apparatus consists of several hollow cylinders attached to the sides of the submarine in such a way that they do not impede its passage through the water. The number of these cylinders depends on the number of men in the crew.

The outer chambers are reached by two doors from the interior of the vessel. Inside of each of these cylinders is another airtight chamber with four compartments holding compressed air.

When the shipwrecked crew is inside the inner chamber and the doors are tightened, a lever releases it from the outer cylinder which is firmly attached to the sides of the submarine. The cylinder containing the men is constructed in such a manner that it will float automatically, to the surface even from a depth of 600 feet.

### Any Woman Can Look Stylish

By MAE MARTIN

Most stylish looking women know simple ways to make a season's things conform to this season's styles. Thousands have learned how easily they can transform a dress or a blouse, or coat, or the quietness of home, or dyeing. With these, fadless Diamond Dyes, anyone can do this successfully. The "know-how" is in the dyes. Diamond Dyes don't streak or spoil like inferior dyes. Washable fabrics almost like magic over the out-of-style or faded colors. Tineling with Diamond Dyes is easy as basting, and dyes take just a little more time. Only Diamond Dyes are safe to use. They have been perfected by over 50 years experience. Insist on them and save disappointment.

"Color Craft," my big new book of dollar-saving hints, will be sent you FREE. Write Mae Martin, Diamond Dyes, Windsor, Ontario.

### Opening of Bay Route

Submission is Made to Hold Monster Excursions From All Parts of Canada

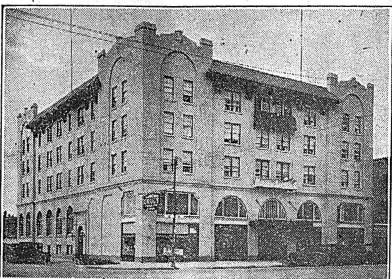

By way of establishing an "entente cordiale" W. Moss Thrasher, secretary of the United Farmers of Canada, Saskatchewan section, suggests that the opening of the Hudson Bay trade route to Great Britain be celebrated by a huge excursion from all parts of Canada, the mid-western states and Great Britain, the meeting place to be on the shores of the bay.

Mr. Thrasher also suggests that at the same time the Federal government should take steps to eliminate all trade restrictions with the Mother Country and bend every effort toward centralizing the huge purchasing power of western Canada in Great Britain, where he points out, the western farmers sell the bulk of their products.

He believes that this would be the first logical step towards solution of western Canada's immigration as well as industrial problem, and that something should be done when the west is more closely linked with the Old Country by the opening of the Hudson Bay route.

"Western Canada sells its surplus products in Great Britain," he says, "and accordingly should buy manufactured products required from that source. No country can carry on successfully by selling to one market and buying from another. Someone will have to suffer. The lack of balance will eventually be felt."

### NEW HOTEL AT LETHBRIDGE

The Marquis Hotel, Lethbridge, Alta., which has been recently opened to the public, under the management of Mr. A. W. Edwards, the Marquis is fully modern in all its appointments, is a decided asset to the city of Lethbridge, and is proving quite popular with the travelling public. The Marquis Hotel was named after the new variety of wheat of that name, and was built as a community enterprise at a cost of \$275,000.

### Cattle Feeding Awards

C. B. Latta, Govan, Wins Prize in Connection With Saskatchewan Competition

C. B. Latta, Govan, Sask., won the first prize of \$100 in the carload lot contest staged in connection with the Saskatchewan farmers' cattle feeding competitions, according to the report of the judges' awards received by Hon. C. M. Hamilton.

Mr. Latta also wins second prize, \$45, in the competition for groups of ten to fifteen animals, and second prize of \$20 in the group of five animals, making a total of \$165 in prize money. In addition he sold his steers at good prices. Mr. Latta made a gross profit of \$49.63 per head on his carload lot; \$43.17 per head on his group of ten, and a gross profit of \$56.70 per head in his group of five.

C. J. Peters, of Browne, won second prize, amounting to \$75 for the records made by his carload lot. Mr. Peters made good profits. A total of 26 steers were sold at a gross profit per head of \$58.36. A net profit of over \$20 per head. Among other prize winners, B. A. Wright, Drinkwater, won fourth prize in the carload lot, and also fourth for group of five.

### Winnipeg Newspaper Union

1106  
Our Boys' Pajamas

It is essential that boys have comfortable, soft, washable pajamas. Mother will be happy to find the "Fowler's Extra Wild Strawberry" pajamas for the little fellow, tailored enough to suit the grown-up boy. Any soft washable material is suitable for this night-garment. The coat is high above the neck or round low for the waist. Buttons and buttons or braid loops finish the front closing. No. 1106 is cut in sizes 4 to 16 years. Size 10 requires 3½ yards 32-inch or 3¾ yards 36-inch material. Price 25 cents the pattern.

*A mixture of very fragrant and mild tobaccos*

### SUNDAY SCHOOL LESSON

OCTOBER 14

#### SPIRITUAL GIFTS

Golden Text: "Now abideth faith, hope, love, these three; and the greatest of these is love"—I Corinthians 13:13.

Lesson: 1 Corinthians 12:14.

Devotional Reading: 1 John 4:7-10.

#### Explanations and Comments

Spiritual Gifts are diverse. But the Spirit is the same 12:4-7. There was rivalry among the Corinthians as to which of them possessed the greatest gift for God's service. "The tendency at Corinth was to consider spiritual gifts as those showy rather than those solid character." The reverse was Paul's way.

"The things we consider most remarkable may, after all, be least important. An ecstasy is pleasant, but fidelity is more significant. The touchstone and test of our Christianity is our avowal of Jesus Christ. If in our souls we own Him Lord, if we are possessed of the Spirit of Life, then we are Christians."

There are different gifts. Paul wrote the Corinthians, but the same Spirit reveals himself. In them all, there are different ways of ministry, but back of them all is the same love. There are different sorts of activities, but they are all wrought by the same God. To each one is given his manifestation of the Spirit for the good of others.

Paul writes in verse seven to eleven. Paul mentions various spiritual gifts and repeats, "different as they are, they are alike in source, the Spirit appointing them as He wills. Paul does not encourage spiritual gifts, he realizes their value, but he realizes also the need of unity and co-operation in the church, and this he enforces in verses 12-20. By the figure of the body, and its members, he shows that the members are different but essential to the body, so it is with the church and its members.

#### Descriptive Atlas of Canada

100,000 Copies Distributed to School Children in Old Country

School children in the British Isles this year receive over 100,000 copies of a descriptive atlas of Canada, provided by the Department of Immigration. This is part of an intensive publicity to induce migration to Canada.

The atlas is distributed free to students in the Old Country, through the central office of the department in London. Agents of the department travel through the country in demonstration vans, carrying exhibits descriptive of Canadian industries, and they lecture at the various schools. Copies of the atlas are left with the schoolmasters. Large wall maps are also provided.

The book comprises eighty pages and is stated to compare favorably with the geographies used in Canadian schools. Besides a large number of colored maps, it contains literature dealing with the physical characteristics, climate and industries of the various provinces. Special emphasis is placed on the opportunities open to those who wish to settle on Canadian farms. The maps have been prepared by the Natural Resources Intelligence Branch of the Department of the Interior, and are stated to be of the most modern type.

The atlas is eagerly received by teachers, officials indicate, and is claimed to have very much to do with the increasing desire by young people to look towards Canada as their future home.

Large numbers of the book are also in demand in the United States and thousands of requests for copies have been received from American schools. In congratulating Canadian officials on the excellence of the book, teachers over the border admit that geographies used in their schools give a very restricted and often inaccurate conception of this country. The atlas is particularly in demand in the farming areas in the central States.

Wife (to returning husband at seaside resort): Oh, darling, I'm so glad you're come. We heard that some idiot had fallen over the cliff, and I felt sure it was you."

We have often wondered, in our innocent way, whether the inventor of the telephone booth also designed the breakfast nook.

China's new warship is called "Peace." Hereafter it will be conceded that the Chinese understand a joke.

#### Makes First Entry

Saskatchewan Farmer Makes Entry In Grain and Hay Show at Chicago

The distinction of making the first entry in the International Grain and Hay Show to be held at Chicago next December goes to Canada. James A. Paur, a farmer at Langham, Saskatchewan, has entered samples of Marquis wheat and of rye. Canada always carries off a fair share of the awards at the International Show. In the last 17 years the Dominion has won the world's wheat championship 14 times.

In shipping their choicest tea over land and sea, great tea planters never take any chances of the tea deteriorating in transit. They pack it in aluminum or lead—Red Rose Tea is always packed in aluminum, so it will come to you as fresh and flavorful as the day it was blended. 9-w

### WRIGLEY'S P.K. CHEWING SWEET

## VISCOUNT PEEL VOICES THANKS OF EMPIRE PARTY

Sydney, N.S.—Delegates of the Empire Parliamentary Association have bade their farewell to Canada. "We have been treated like princes. We have been received like old friends," exclaimed Viscount Peel, chairman of the delegation, addressing a final dinner given by the Canadian club and city of Sydney. And to his words of farewell and gratitude were added those of representatives from every parliament in the Empire.

In their journeys through Canada, Lord Peel felt, members of the British delegation had been able to remove misconceptions. It had been thought in some quarters apparently, that the Empire marketing board was an instrument for pushing British goods in Empire markets. In reality it was designed to push Empire goods in the British market and the cost fell on the British taxpayer. It had been thought, in some quarters, that the unemployment insurance miscalculated the dole, was demoralizing charity. In reality the employee paid his share to a fund and was entitled as of right to his insurance payment when the curse of unemployment fell upon him.

"We have heard it suggested," Lord Peel added, "that we desire to load Canada with inefficient unemployed."

"I repudiate with all my force this infamous suggestion, but there are, I am convinced, great opportunities in Canada, with good organization, for substantial numbers of able and willing workers from our country who will form a fine type of Canadian citizen." We further discussed the opportunities for the extended investment of capital from Great Britain and the other Dominions and our speakers have laid stress on the necessity for accurate information so that there will be no disappointment to the investor.

### General Allenby in New York

**British Hero Honored By Official Salute Of 17 Guns**

New York.—Field Marshal Sir Edmund H. H. Allenby, so-called last crusader, who conquered the Turks in Palestine and Egypt for the British, was welcomed on his arrival here for the American Legion Convention to be held soon in San Antonio.

Arriving on the liner Majestic with Lady Allenby, General Allenby received an official salute of 17 guns from the army reservation on Governor Island as the city's reception boat Macom carried him from the liner to the battery at the Southern tip of Manhattan Island.

The British hero spoke of the growing tendency toward "open diplomacy" among nations but saw no sign for great disarmament at present.

"I do not believe there is anyone in the world who does not want peace if they can get it," he said. "However, one has to be ready for war, as you do not keep burglars out by leaving the door unlocked."

### First Freight Has Reached Flin Flon

**Five Tractors Have Been Delivered At Mile 83**

Flin Flon, Man.—Following the driving of the last spike on the Flin Flon Railway, freight has started to arrive by train and the first load, consisting of five tractors with tracks on attachments, delivered a mile 83.

There are now 15 tractors hauling freight in and out of the big mine. The arrival of a further shipment of tractors is expected in the near future and by freeze-up roads to Island Falls should be in shape to stand the heavy traffic which will cross them during the coming winter.

**No Demonstrations Allowed**

Jerusalem.—The district commissioner of Jerusalem has refused to permit the orthodox Agudath Israel to hold a festival procession on the occasion of Succoth and has also banned a Moslem religious demonstration. It was stated that the government would prohibit any religious manifestation in Palestine.

**Eliminate Level Crossings**

Toronto.—With the object of eliminating every level crossing in Ontario the provincial department of highways is having an official report made on every point where railway lines cross one of their highways.

### Fire Takes Four Lives

**When Farm House Near Brandon Was Completely Destroyed**

Brandon, Man.—Four persons were burned to death when the farm home of Alex Wilson, near Moore Park, Man., was destroyed by fire.

The dead: Mr. and Mrs. Alex Wilson, their son, and Miss Sarah Wilson, Mr. Wilson's sister.

The fire was discovered by I. M. Harrigan, a neighbor, when he was awakened by the reflection of the flames upon his windows. He put on his clothing and rushed out to discover that the Wilson house was on fire. The blaze was too far advanced at the time to permit rescue work.

W. E. Mann, general storekeeper at Moore Park, father of Mrs. Wilson, was also quickly on the scene, but the heat was so intense that he could not get near the building.

All of the bodies were recovered. The cause of the fire is a mystery. The barn, garage and other buildings on the farm were unharmed.

### Exhibit For Royal Winter Fair

**Saskatchewan Will Send Fifty Of Its Best Horses**

Regina.—Fifty horses, the pick of the Clydesdales, Percherons and Belgians in the province, will represent Saskatchewan at the Royal Fair, Toronto, in November, it was decided at a meeting of the livestock board held recently.

While many selections have yet to be made, both in horses and other classes, the board has definitely decided that the following will exhibit: Clydesdales: — The Experimental Farm at Indian Head, the University of Saskatchewan, John Falconer, Govan, and Mrs. W. H. Bryce, Donalda Lodge, Arcola.

Percherons: — C. M. Rear, Regina; Robert Weir, Weldon; George Doan and Sons, Stoney Beach.

Belgians: — C. M. Rear, Regina; Robert Thomas, Grandora, Andrew Norman, Rouleau.

In the horse exhibits from this province there will be 20 Clydesdales, 15 Belgians and 15 Percherons. Many other exhibitors are yet to be named.

### Adheres To Peace Pact

**Soviets Deposit Note With State Department At Washington**

Washington, D.C.—Soviet Russia has joined the other Nations adhering to the Kellogg-Briand treaty for renunciation of war. A document formally signifying Russia's adherence has been deposited with the State department by the French embassy, acting on behalf of the Moscow government, the United Press learned.

State department officials declined to discuss the content of the document, but said it was placed with the original copy of the treaty. Officials intimated it would not be made public.

### Zeppelin Makes First Trip

**Fald Friendly Visit To England and Returned To Berlin**

Berlin.—After paying a friendly visit to England, the new German dirigible Graf Zeppelin returned to Berlin. As the huge airship soared over the city in the bright sunshine thousands flocked to the streets and saw it describe a graceful loop over Wilhelmstrasse. Flowers for President von Hindenburg, attached to a small parachute, were released as the airship passed over Executive Palace, but they were carried six blocks beyond the building.

**Find Victim Of Plane Crash**

Portland, Wash.—The body of Dr. E. Holden, of Victoria, B.C., one of the seven victims of the ill-fated Victoria-Seattle plane which disappeared while en route to Seattle, August 25, was found in Port Angeles Harbor. The body was headless and badly broken. It was the fourth body of the seven in the plane to be found. The plane itself has never been located.

**Premier King Returning**

Ottawa.—Premier Mackenzie King will return to Canada on or about the 19th of this month, according to word received here. He will probably be accompanied on his return journey by Hon. C. A. Dumpling, minister of railways; and Hon. Raoul Dandurand, government leader in the senate.

**Finds Lost Scout**

Windsor, N.S.—Col. Collins, South African delegate to the Empire Parliamentary Association, discovered W. Muncey, missing Canadian scout of the Boer War, whom Collins has been seeking all over Canada, resides at 1236 27th Avenue, Vancouver.

### Arrest Train Bandit

**Robber Of Ontario Mail Car Offered No Resistance**

Windsor.—Three hours after a mail car had been rifled of Canadian currency estimated at about \$40,000, John Gibbs, 20, said to come from Los Angeles, Cal., was arrested by the local police on the Detroit River train ferry and landed in the goal here. According to authorities here he has admitted his guilt. When taken into custody he was carrying two pistols but offered no resistance to the officers.

The robbery was a most daring one the lone bandit holding the mail clerks helpless at the point of a revolver while he calmly looted the car.

### Major Godfrey Returns

**Brings Motor Of Big Seaplane Which Was Wrecked In Crash**

Edmonton.—Major A. E. Godfrey, noted Canadian aviator, whose recent crash in the northern wilds attracted Dominion-wide attention, arrived in Edmonton recently from Peace River, accompanied by Sergeant-Major Graham, one of his three companions on the flight which ended in the Peace River.

Major Godfrey brought with him the motor of the big Fairchild seaplane which he and Sergeant Graham remained behind to salvage from the wreckage of the machine. The motor was forwarded to Ottawa.

## TO INVESTIGATE MARKETING OF CANADIAN WHEAT

Winnipeg.—Conditions surrounding the marketing of the wheat crop are the main concern at present of W. R. Matherwell, federal minister of agriculture, who was here in connection with departmental business.

Immediately following his arrival in the city, Mr. Matherwell went with the Board of Grain Commissioners to the Grain Exchange for a meeting with the inspection staff. He spent a day at Fort William inspecting the handling of grain there. The minister indicated that investigation into some conditions pertaining to the marketing of Canadian wheat was in progress, partly as a result of complaints which he had heard in the British Isles during his recent trip in connection with the marketing of last year's crop.

In his investigations abroad, Mr. Matherwell was guided by the relation of Canadian production and trade to that of the countries he visited, keeping a sharp lookout for methods which might be applicable in Canada, and opportunities for marketing of Canadian products learned.

State department officials declined to discuss the content of the document, but said it was placed with the original copy of the treaty. Officials intimated it would not be made public.

### Opposes Renewals Of Entente

**Ramsay MacDonald Thinks Alliance With France Is Unwise**

London, Eng.—At the recent Labor conference, Ramsay MacDonald made an important speech saying: "We must orient our diplomatic policy anew. I say that, without entity to France, it is not good for France or for us that we should re-establish any sort of alliance."

France is bound to take notice of this declaration on British policy from the leader of the opposition. The country has not yet any clear knowledge as to whether the present government is re-establishing the alliance with France, but unpublished agreements as to armaments on land seem to imply a new entente.

Ramsay MacDonald proposes to drag a declaration from the government when parliament meets next month. There are reports that the French government will immediately publish all correspondence on the naval side of the agreement. The understanding as to land forces is said to have been expressed only verbally.

**To Open Office In Peru**

Ottawa.—G. R. Stevens, Canadian Trade Commissioner in South Africa, has arrived in Canada en route to Peru, where he will open a new office with jurisdiction over Peru, Bolivia and Ecuador. Prior to his departure for South America, Mr. Stevens will visit manufacturing centres of Canada in connection with Canadian exports to his former territory.

### Farmers To Hold Meeting

Saskatoon, Sask.—Some 400 farmers who specialize in the breeding of horses, cattle, sheep and swine will gather in Saskatoon on January 22, 23 and 24, when the Saskatchewan Livestock Association, with all its sections, meets in annual convention. Sessions will be held in the King George Hotel here, and there will be numerous meetings on the different aspects of stock farming in the province.

**A VERY GRIM TALE**

Once upon a time there were three bears. Along came the Trans-Canada and then there were two. The moral to this little story is—do not trespass on the railway tracks. Mother Bear is seen giving her sons an airing at Lake Louise (C.P.R. photo).

### POLICY IS CRITICIZED

**Quebec Liquor Commission Inspector Threatened With Death By Captors**

Montreal.—Joseph A. Patry, Quebec liquor commission inspector, was kidnapped by bootleggers at Riviere Du Loup. He managed to reach shore by paddling his craft with an old piece of wood.

Patry was instructed to probe suspected illegal transportation of liquor by boat to New Brunswick, and with two companions set out for a large gasoline yacht which was anchored a short distance from the Riviere Du Loup wharf. The inspector managed to scramble aboard, but before his assistant could mount the boat, the yacht's engines were started and the yacht set off for the middle of the river. Patry tried to draw his revolver, but his arms were seized from behind and he was warned it he raised an outcry he would be killed, and his body thrown overboard.

Later on the officer was lowered into a leaky rowboat and left to his fate. The matter has been reported to the authorities.

### Turned Adrift In Leaky Boat

**DENIAL MADE OF VIOLATION OF LIQUOR LAWS**

Ottawa.—Hon. W. D. Euler, minister of national revenue, has issued a lengthy statement dealing in detail with a certain charge reported to have been made by R. H. Pooley, attorney-general of British Columbia against the department which Mr. Euler administers.

Mr. Euler declares that his department is attempting in all sincerity to co-operate with the provinces in the enforcement of their liquor laws and that not in a single instance have licenses for breweries or distilleries been granted when provinces were opposed.

The minister adds specifically with the shipment of a carload of whisky from the distillery of Gooderham and Worts to which, according to news reports, Mr. Pooley made special mention.

"The charge that the Dominion Government is deliberately violating its own law for the benefit of the liquor interests is utterly untrue," Mr. Euler declares. "Such a statement would show a poor lack of knowledge of the true situation and a quite apparent disinclination to accept our offer of co-operation. I cannot believe that Hon. Mr. Pooley made such a charge."

The minister suggested that if the British Columbia attorney-general had any fault to find with the Department of National Revenue it would have been fair for him to address his complaints to the department rather than to issue statements to the press.

### New Province For Canada Suggested

**Would Consist Of Districts At Head Of Great Lakes**

Fort William, Ont.—It is expected here that a public meeting will be called early next month to consider the question of secession from Ontario and formation of a tenth province.

A similar proposal was made a few years ago but was dropped, but action is again being urged in this district.

Thunder Bay, Rainy River and Kenora districts would form the new province making up in area what they lack in present population.

Failing creation of a tenth legislature in the Dominion, advocates of secession are willing to move their allegiance from Ontario to Manitoba.

A body of young business men is behind the movement which so far is confined pretty well to this city. Citizens in Port Arthur and other centres, however, are said to be willing to join in the proposed campaign.

### Will See Air Liner Arrive

**Canadian Engineer Going To Lakehurst To Represent Dominion Air Board**

Ottawa.—Wing Commander E. W. Stedman, chief Canadian aeronautical engineer, will view the arrival of the German air liner Graf Zeppelin at Lakehurst, N.J., as representative of the Dominion air board it is learned.

Mr. Stedman examined the big ship this summer when in Germany and discussed the flight with Commodore Edeker and other officers who will be in charge of the aircraft.

Special attention will be given to the methods used for mooring the immense craft at Lakewood. A mooring mast 250 feet in height is being constructed by the Canadian Government at the flying field at St. Huberts, Que., and some improvements may result from Mr. Stedman's observations.

**Aged Indian Chief Dead**

Valleyfield.—An Indian chief whose age was given in tribal records as 130 years was mourned here by four sons, each of whom is over 90 years old. The aged leader was Manuel Portes, chief of the Santa Rosa Indians.

**Honored Canadian Minister**

Paris.—Premier Mackenzie King, of Canada, gave a dinner, Oct. 2, in honor of Hon. Phillip Roy, first Canadian minister to France. The dinner was also tendered as a graceful compliment to Madame Roy, whose birthday it was.

**Nurses For Labrador**

Montreal.—Two nurses, Misses Canby and Cole, have left Quebec for Labrador, despatched there by the Federal Minister of Health. They will act at outlying stations of Harrington and Mintoan Bay.

## Compulsory Marking Of Eggs

Buyers in England Would Know Product Was Canadian

In consideration of the fact that there is apparently a growing demand in the British Isles for Canadian imports of agricultural products—especially butter and eggs, the Minister of Agriculture and Fisheries of the United Kingdom has now recommended through the committees appointed to deal with such work, that an order in council should be made prohibiting the sale of eggs in foreign countries for export to England unless they are marked.

The regulations as to marking are that every egg shall be marked durably in ink at letters at least one-sixteenth of an inch high. Every egg shall bear this mark—the name of the country from which the eggs are to be shipped. This information was received from a bulletin issued by the Saskatchewan Department of Agriculture.

Further this report states, the motive for such an action is to assure the buyers of the Old Land that they are getting products which have been produced in the United Kingdom. There is undoubtedly a growing demand for this trade, and in view of the fact that the Dominion government have recently taken steps to make such restrictions as will invariably raise the standard of the Canadian product, there is every likelihood of there being a huge increase in the trade in agricultural products in the near future.

This increased interest on the part of the consumers should be appreciated by Canadians, this report intimates, in view of the fact that up to date the exports of such commodities have been rather low as compared with other countries in the Empire or without.

"This action was taken by the Empire Marketing Board to encourage the egg consumers of the Mother Country to buy Canadian products, and that this idea of marking them with indestructible ink so that the name of the country would not be destroyed even after the egg was boiled, would assist them in their natural desire to patronize Empire products," quoting this report further.

Figures showing Canada's exports to the United Kingdom for July this year show the following results: Dressed poultry was exported to the value of \$2,660; butter to the amount of 4,585 cwt.; and eggs to the value of \$47,165, as compared with a total importation value of eggs to the United Kingdom of \$5,825,670.

### Fish From Northern Lakes

Thousands of Pounds Shipped From Alberta to Eastern Cities

The map of Canada is being rolled back so far as the economic handling of fish from the northern lakes is concerned, according to the progress made in the shipment of Lake Athabasca trout and whitefish to such markets as Chicago, New York and Toronto, says the Financial News. The fishing being carried on by two companies at Lake Athabasca, in Alberta, constitutes the most northerly commercial operation in Canada, the extent of which is indicated by R. T. Redd, Federal Inspector of Fisheries, who on his recent return from an inspection trip stated that 62,000 pounds of trout and 4,000 pounds of whitefish were taken from the lake in the first three days of the summer fishing season.

### First Grain Shipment to Spain

The first shipment of wheat from Montreal to Spain left the other day—201,123 bushels. Wheat shipments to foreign countries last year amounted to 118,227,726 bushels from Montreal, but not a single bushel was exported to Spain among the seventeen countries to which grain was consigned. This is said to be the first shipment of grain ever made to Spain.

### Canadian Cattle for Australia

Shipment of Purebred Stock to be Sent from Brandon, Man.

The Australian government has just completed a deal for eighteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeders of Brandon. The animals will be selected from Mr. McGregor's Glenasmack herd by the headmaster of the Australian government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment, apart from some purebred dairy cattle for the Orient from British Columbia, is said to be the first exportation of purebred cattle from Canada overseas.

### Conditions Have Changed

The pioneer who came to Canada 100 years ago, cut all his bridges behind him. He spent his last cent to get here, hundreds of miles of forest and stream divided him from the coast and there was a six weeks' ocean voyage after that. The only way out was to work, to work for thirty, forty, fifty years and some day he might revisit his homeland at his own expense.

What is thought to be the world's biggest tortoise arrived at the London Zoo recently. It weighs about 300 pounds, is three feet six inches long, and is nearly 100 years old.

"Diggings is a good hobby for a middle-aged man," says a doctor. But why does he so often call it

### Canada Has Extinct Volcano

Geologists Working in B. C. Say Eruption Occurred 800 Years Ago

Less than 300 years ago Canada possessed an active volcano, in the opinion of explorers who have been studying the mountains north of Alice Arm, in the northeastern section of British Columbia.

The volcano, according to authorities, is now definitely dead and there is no danger of further eruption. There were apparently two pronounced eruptions which have left their trace and they were separated by a period long enough to allow the lava to cool. The first explosion blew out a crater about 400 yards in diameter. After a period of quiescence sufficiently long to form a hard and level floor in the crater there was a second eruption which formed a cone or scoria of cinders, within the original crater, 300 feet long with a crater 250 feet deep. It was from the base of this cone that the lava flow proceeded.

From the volcano the lava flowed down a creek valley in a stream 300 yards wide until it entered the valley of the Tseuz River. Crossing this river to the west side, it completely dammed the stream, forming or enlarging a lake nearby. The lava here turned north and continued down the valley of the Tseuz in a stream 2,000 feet wide, as far as the Naas River. By the time it reached the Naas the lava had lost much of its fluidity and the great river was not dammed, although the lava spread out down the left bank for six miles.

Indians living near the extinct volcano say that the last eruption was about 150 years ago, but geologists discovered trees 170 years old growing on the edge of the lava. They place the time of the eruption at about 300 years ago.

### Cost of Raising Dairy Heifers

Record Is Kept at Experimental Station in New Brunswick

An accurate record of the cost of raising dairy heifers was kept at the Fredericton, New Brunswick, Experimental station. One lot of three heifers, including one Ayrshire and two Holsteins, were kept and fed together from birth until they were one year old. They were fed on whole milk until from four to six weeks old and then gradually changed to skim milk. When the calves were three months old they received in addition to the skim milk, one part of flax seed and four parts eat meal cooked and made into a gruel. Each calf was fed from one-quarter to one pound of this gruel per day, the amount fed depending upon the ages and condition of the calves. They also received hay, roots and some dry grain. The composition of the dry grain mixture was varied from time to time but was made up chiefly of three parts bran, two parts crushed oats, one part oil cake, and one part brewer's grains. The aim in feeding was to keep the calves growing and to avoid a setback. The superintendent of the station, in his 1927 report, published by the Department of Agriculture at Ottawa, shows the detail of the feeding and the cost of the feed, which amounted to \$65 for the three calves during the year.

### Canadian Cattle for Australia

Shipment of Purebred Stock to be Sent from Brandon, Man.

The Australian government has just completed a deal for eighteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeders of Brandon. The pioneer who came to Canada 100 years ago, cut all his bridges behind him. He spent his last cent to get here, hundreds of miles of forest and stream divided him from the coast and there was a six weeks' ocean voyage after that. The only way out was to work, to work for thirty, forty, fifty years and some day he might revisit his homeland at his own expense.

What is thought to be the world's biggest tortoise arrived at the London Zoo recently. It weighs about 300 pounds, is three feet six inches long, and is nearly 100 years old.

"Diggings is a good hobby for a middle-aged man," says a doctor. But why does he so often call it

### Geologists Working in B. C. Say Eruption Occurred 800 Years Ago

Less than 300 years ago Canada possessed an active volcano, in the opinion of explorers who have been studying the mountains north of Alice Arm, in the northeastern section of British Columbia.

The volcano, according to authorities, is now definitely dead and there is no danger of further eruption. There were apparently two pronounced eruptions which have left their trace and they were separated by a period long enough to allow the lava to cool. The first explosion blew out a crater about 400 yards in diameter. After a period of quiescence sufficiently long to form a hard and level floor in the crater there was a second eruption which formed a cone or scoria of cinders, within the original crater, 300 feet long with a crater 250 feet deep. It was from the base of this cone that the lava flow proceeded.

From the volcano the lava flowed down a creek valley in a stream 300 yards wide until it entered the valley of the Tseuz River. Crossing this river to the west side, it completely dammed the stream, forming or enlarging a lake nearby. The lava here turned north and continued down the valley of the Tseuz in a stream 2,000 feet wide, as far as the Naas River. By the time it reached the Naas the lava had lost much of its fluidity and the great river was not dammed, although the lava spread out down the left bank for six miles.

Indians living near the extinct volcano say that the last eruption was about 150 years ago, but geologists discovered trees 170 years old growing on the edge of the lava. They place the time of the eruption at about 300 years ago.

### Cost of Raising Dairy Heifers

Record Is Kept at Experimental Station in New Brunswick

An accurate record of the cost of raising dairy heifers was kept at the Fredericton, New Brunswick, Experimental station. One lot of three heifers, including one Ayrshire and two Holsteins, were kept and fed together from birth until they were one year old. They were fed on whole milk until from four to six weeks old and then gradually changed to skim milk. When the calves were three months old they received in addition to the skim milk, one part of flax seed and four parts eat meal cooked and made into a gruel. Each calf was fed from one-quarter to one pound of this gruel per day, the amount fed depending upon the ages and condition of the calves. They also received hay, roots and some dry grain. The composition of the dry grain mixture was varied from time to time but was made up chiefly of three parts bran, two parts crushed oats, one part oil cake, and one part brewer's grains. The aim in feeding was to keep the calves growing and to avoid a setback. The superintendent of the station, in his 1927 report, published by the Department of Agriculture at Ottawa, shows the detail of the feeding and the cost of the feed, which amounted to \$65 for the three calves during the year.

### Canadian Cattle for Australia

Shipment of Purebred Stock to be Sent from Brandon, Man.

The Australian government has just completed a deal for eighteen foundation heifers and two bulls from J. D. McGregor and Sons, the well-known Aberdeen Angus breeders of Brandon. The animals will be selected from Mr. McGregor's Glenasmack herd by the headmaster of the Australian government and shipped by the Canadian Pacific Railway by way of Vancouver. This shipment, apart from some purebred dairy cattle for the Orient from British Columbia, is said to be the first exportation of purebred cattle from Canada overseas.

### Conditions Have Changed

## CHAPTER II—Continued.

Fresh from his exercises and shower, his cheeks red, his dark eyes shining with the clear glow of health, his step springy and free, Donald was a picture of rugged health and strength. But for all this apparent outward brightness, inwardly he felt rebellious. Douglas' invitation had brought a great longing for the comforts of his past life. Why should he assume the role of a pupilist to elicit out an existence? Why wear shabby clothes and even know the pangs of hunger? He had to wire his father that he was destitute and plenty of money would be forthcoming.

A big steak at "Old Joe's" furnished him a hearty meal. As he selected the money from his meagre supply of cash to pay his check, Old Joe bent his grizzled head forward. "Don't go hungry; come in any time."

"Thanks, Joe."

Donald was in a dark mood. He heard the sound of happy laughter coming from a saloon on the corner. There behind those swinging doors was momentary recess from worldly cares. He stood in the door of the restaurant and looked across the Inlet at the twin peaks, known as the "Lions," which guard the entrance to Vancouver's harbor. The sun was setting in a mass of fleecy clouds; the clouds became a luminous gauze, and a golden splendor spread over the water. The mountains were suffused in violet, while the snow-fields took on a faint stain of rose. Donald's face glowed as he watched.

"Some country!" he breathed. He turned to catch a friendly smile from Old Joe as he worked over his range. "And some people!" he added fervently.

Once more he turned to the mountains. The glow had vanished and the Lions stood in bold relief against the clear sky. The massive snow-capped peaks seemed to impart a new strength to his being. "I'll not quit. I'm going to make good," he said grimly.

## CHAPTER III.

While on his daily run around Stanley Park the next afternoon Donald was attracted by a horse and rider standing on Prospect Point. The rider was interested in a huge white liner plowing her way through the Narrows, bucking a head tide. The horse, a noble animal, with full mane and tail, was restive, rocking and prancing in his eagerness to be off.

When Donald lifted his eyes to the rider he saw a beautiful, haughty face with skin of a milky whiteness, a heavy mass of dark brown hair, neatly coiffed under a trim riding hat, and a pair of wonderful brown eyes that suddenly grew cold.

A shower of dirt and pebbles stung

**MEDICINE FOR  
YOUNG GIRLS**

Mothers Endorse Lydia E. Pinkham's Vegetable Compound

Sydney, N. S.—"My seventeen year old daughter took Lydia E. Pinkham's Vegetable Compound for rheumatism and pains. She could not go about much with the other girls as she was not strong enough. We got six bottles and it did her a great deal. She is working now and going to school three miles every morning and back in the evening."—Mrs. MARY VANCE, 44 Lingan Road, Sydney, N. S.

Pinewood, Ont.—"I constantly had pains in my back and side and spent two days in bed every month. I have taken three boxes of Lydia E. Pinkham's Vegetable Compound. They have greatly relieved me and I am able to hold them in the house. I have recommended your good medicine to several friends and have given it to my 17 year-old girl."—Mrs. ALICE OULDRIDGE, Pinewood, Ontario.

W. N. U. 1764

leave thy woody bower, Sir Don, the goddess awaits thee."

Seething inwardly, Donald tried to appear dignified as he stepped to the road, but the attempt was a dismal failure. How could one approach anything like dignity when dressed in a pair of running trunks, a torn and frayed jersey, socks turned down over a pair of dirty tennis shoes, and without hat or coat? All this added to the fact that he faced a battery of two big brown eyes, who thought him a masher. The greatest actor in the world would fail to register dignity under such conditions. He had a confused remembrance of a jumble of words that went for a formal introduction. He felt his face hot, and knew he was blushing furiously, which did not add to his composure.

Donald's face as the horse was swung about as though on a pivot and with its rider was off like a wind.

"A thoroughbred," he exclaimed, as he watched the rider until she turned a corner in the drive. "Two of them! And she thinks I am a low-down masher," he added ruefully.

That afternoon he went through fifteen rounds of boxing, finishing strong and fresh to tackle pulleys and punching-bags.

Andy was joyful. "It will never go twenty rounds, me lad. That straight left of yours alone would stop 'im in 'arf that time."

"This is my last day of road-work," remarked Donald to his friend on Friday afternoon, as he slipped off his running shoes.

As he and Douglas neared Prospect Point, Donald's thoughts turned to the girl of yesterday. "She was haughty as a princess," unwittingly had spoken his misgivings aloud.

"What's that?" queried his companion.

"I was talking to myself," laughed Donald.

"Bad sign! You are either in love or old age has overtaken you. Too bad!" Douglas wagged his head sadly.

"I may as well tell you," confided Donald; "I saw a Greek goddess mounted on an Arabian charger yesterday."

Douglas threw out his hand tragically. "Donald, my poor friend! I am afraid that I hit you too hard in that last round," he said in a voice of mock compassion.

Douglas stopped short. "Look!" he cried, pointing excitedly, "there she is!"

"I'll be jiggered!" exclaimed Douglas.

"Don't blame me, but isn't she a peach?" said Donald admiringly.

Douglas burst out laughing. "Do you know who that is?" he asked with a peculiar inflection.

"I told you—a Greek goddess, mount!"

"That's my sister, Janet," interrupted Douglas.

Donald's mouth opened. He stared at her. "Your what?" he exploded.

"Oh, I forgot! Poor fellow!" said Douglas, soliloquizing, as his face assumed a mournful expression. "I'll certainly have to pull my punches hereafter!" He leaned toward Donald and placed his lips close to his ear. "S-i-l-e-n-s," he spelled slowly. "Does the old bean grasp it?"

"Cut the comedy," growled Donald as he jerked Douglas to the side of the road out of sight of the equestrienne. "Good heavens! Your sister!" he groaned, "and she thinks I am a masher."

"Why should she think that of you?"

Donald told him of yesterday's occurrence.

"This is great!" chuckled Douglas. "Come and meet my sister, Donald. I'll tell her that you can't help flirting, and that will fix things up all right. I'll call her." He grinned facetiously.

"Don't you dare! You—" Donald warned.

Douglas avoided Donald's wild clutch, ran to the centre of the road and waved his arm.

"On, Janet," he shouted.

Donald shook an angry fist at his tormentor and sprang to the shelter of the trees. There was a thud of hoofs, a spattering of gravel, and the sound ofreaking leather.

"What in the world are you doing here in that dress, Doug?" asked Janet.

"Janet," said her brother in a low, mysterious voice, "I've got the fellow that tried to flirt with you yesterday; he's in there." He pointed to the bush. "The poor fellow is a confirmed flirt; had it in its worst form. I beg of you, Sister, be lenient, be merciful. He thinks you are a Greek goddess." He tapped his forehead significantly.

Donald cursed the irrepressible youth's sense of humor. If he could have reached the humorist, at that moment he would have pitched him into the Inlet without compunction.

Janet eyed her brother with disapproval. "What are you talking about, Doug? Have you taken leave of your senses entirely?"

"I will bring forth the erring knight for you to censure," rejoined her brother, bowing low in exaggerated deference. "Ho!" he shouted,

leaving the woods to the goddess awaiting thee."

Seething inwardly, Donald tried to appear dignified as he stepped to the road, but the attempt was a dismal failure. How could one approach anything like dignity when dressed in a pair of running trunks, a torn and frayed jersey, socks turned down over a pair of dirty tennis shoes, and without hat or coat? All this added to the fact that he faced a battery of two big brown eyes, who thought him a masher. The greatest actor in the world would fail to register dignity under such conditions. He had a confused remembrance of a jumble of words that went for a formal introduction. He felt his face hot, and knew he was blushing furiously, which did not add to his composure.

The girl looked down curiously, but not without interest, at the embarrased young man.

Donald finally mustered courage to glance up at the face above him. The deep brown eyes regarding him held just a trace of humor. The full red lips were parted to show a flash of white, even teeth.

"It is a pleasure to meet you even under such inauspicious circumstances," stammered Donald. He turned to glance at the grinning cause of his discomfiture. "I would suggest, Miss Rennie, that you have a doctor waiting at your home, as I intend to commit mayhem upon the person of your brother as soon as you have gone."

(To Be Continued.)

## RECIPES FOR THIS WEEK

(By BETTY BARCLAY)

## Orange Balls

Soak orange peels three days in cold water changing the water daily; then put in hot water, and boil until soft. Drain, wipe dry with cheese-cloth, chop fine, and measure. Take an equal amount of sugar, and for each one-third of a cup of sugar add two tablespoons each of water and butter, and boil until it will spin a thread, then add the chopped peel, boil about five minutes; cool, put on a board, sprinkle with granulated sugar, and shape into small balls. These may be rolled in coarse sugar, and allowed to dry, or they may be dipped in fondant, flavored with vanilla. They are delicious dipped in chocolate with a few grains of orange sprinkled on the top of each chocolate before it hardens.

## Tenderloin of Beef Stuffed with Oysters

Large tenderloin.

One pint oysters.

One teacup cracker crumbs.

Salt.

Pepper.

Celeri salt.

Split the tenderloin. Season with salt and pepper. Make a dressing with the oysters, crackers, and salt and pepper. Spread the one-half tenderloin on top. Put the other one-half tenderloin on top. Tie together with string and bake. Baste often.

## Minard's Liniment—Popular for 50 Years

There is in Fifth avenue, New York a 12-storey apartment building in which every door knob is gold plated. In one flat every hinge, door handle and key is of gold.

Isn't it funny how people entirely without principle manage to draw so much interest?

## Agrees with Baby

Three Aids to Good Meals  
Always Reliable—Sold by all Grocers.

Inspiration From  
Commonplace ThingsDoor-Knocker Gave Beethoven Idea  
for Glorious Concertos

An ordinary mind would be scarcely seem possible that much music could be got out of a door-knocker. Yet it was this sound which is said to have inspired Beethoven's glorious violin concerto in D. As the musician lay awake one night shaping the concerto in his mind, his musings were interrupted by a beloved neighbor who was endeavoring to accustom his housekeeper and get her to come down and let him in. Beethoven heard his persistent knocking for admission—four slow deliberate knocks at a time. The constant repetition gave the composer the idea he sought and those four knocks are heard all through the opening movement of the concerto, which begins with four unaccompanied D's on the drum—seemingly as unmelodic and unpromising an opening phrase as one could imagine.

In commenting upon the circumstances Sir George Grove has said "those four notes were to Beethoven what the bulk of the old Tenebrae was to Turner, or the daffodils to Wordsworth—commonplace in themselves but transmuted by the fire of genius into an imperishable monument."

A PROBLEM FOR  
YOUNG MOTHERS

Stomach Troubles cause most of the distress of childhood and childhood, and are the greatest problem that a young mother has to solve. The treatment for these digestive disturbances that make baby cry continually and disturb his sleep must be quick and effective, and above all, perfectly safe.

The absolutely safe treatment for disturbances of the stomach and bowel is found in Evelyn's Own Tablets. Thousands of mothers have solved this problem solved through them. They are guaranteed to be free from all injurious drugs and cannot do harm to even the youngest baby.

Evelyn's Own Tablets regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fevers and promote that health-giving sleep which is so important to the baby or growing child. The Tablets are sold by all medicine dealers or by mail at 25¢ a box from The Dr. William's Medicine Co., Brooklyn, Ont.

## Romans Understood

## Method of Soldering

Sample of Work on Iron Ferrule

Discovered in Ancient City

A method of soldering two pieces of iron together with copper was known to Roman artisans in England nearly two thousand years ago.

This is shown by a deep iron ferrule like a modern servile ring unearthed during excavations of the Roman city of Urcionum located in the river Severn and destroyed about A.D. 380.

Lead pipe manufactured and laid in Rome's water system 1,800 years ago was recently pronounced to be in perfect condition.

## Great Lakes "Gambling" Season

The "gambling" season of the Great Lakes is near at hand. Stakes that mount to millions and involve the lives of men are on the play boards of the shippers who soon will be sending their mighty grain and ore carriers to fetch that last cargo of the season and in doing so they stake their ship and the lives of the men against the elements which only last year claimed five ships as victims and cost the lives of 24 men and two women.

Dietitian: "Yes, a few lettuce leaves without oil and a glass of orange juice. There, madam, that completes your daily diet."

Mrs. Overweight: "Thank you so much, Doctor, but do I take this before or after meals?"

First Bachelor: "Is there anything in this affair of yours with the heirress?"

Second Same: "Millions, I hope."

Minard's Liniment for aching joints.

## Teeth and Health

Issued By The Canadian Dental  
Hygiene Council and Published  
By The Saskatchewan Dental  
Society

## TOOTH TURNS BLACK

Your white pearl teeth have perhaps excited the admiration of your friends and your pride in them is fairly pardonable. But one day a tooth that you had been intending to have "fixed" ceased to bother you until by you noted with some little alarm that this tooth was quite dark in contrast to its fellows.

Or, perhaps, your dentist because of your neglect found it necessary to remove the pulp from a tooth, following which operation you found with some dismay that it had changed color, and noticeably so.

Now, what has caused it?

Contrary to your idea, possibly, a tooth gets its shade, not from the outer enamel covering, which is almost colorless, but from the array of colors in the underlying body of dentine.

As a sequence to pulp death and decomposition, we have a disintegration of the blood elements with the production of pigments or color compounds. These permeate the dental structure through its many little tubuli and are reflected through the tooth its shade; this is the principal source of discoloration.

A less frequent cause is from the use of medicinal agents employed in tooth treatments, many of which have the property of staining the dental substance.

Now, unfortunately, as you can see, all of the securing that you may do is of no avail—like the historic spot of "Macbeth"—it will not "out."

However, your dentist by employing bleaching agents within the tooth cavity can with fair success restore the shade, if the discoloration has not remained too long.

## Tourists All Development

The tourist is often the forerunner of the homemaker and investor. He visits the country and sees with his own eyes the character of its people and resources, and if he later returns to settle or invest he is able to do both in a more satisfactory manner.

## THE EASY WAY

Thousands need cod-liver oil to increase vitality and build up resistance.

## Little Helps For This Week

"Thou hast dealt well with Thy servant, O Lord, according unto Thy word."—Psalms cxix, 65.

Beneath the splendor of Thy choice,  
Thy perfect choice for me I rest;  
Outsides it now I dare not live,  
Within it I must needs be blest.

Jean Sophia Pigott.

I would rather be what God chose to make me than the most glorious creature that I could think of. For to have been thought about—born in God's thoughts—and then made by God, is the dearest, grandest, most precious thing in all thinking.

George MacDonald.

Stage Manager (to new hand)—  
"Now then, everything's ready Run up the curtain."

Stage-Hand—"Wot yer talkin' about? Run up the curtain? I'm a stage-hand, not a bloomin' squirrel."

## Charleston Dance Contest

Judged By England's Leader

Mrs. Leslie Sutton, chief judge of the Charleston contest for England, writes: "My unique position as the dancing world's best judge has been the cause of many difficulties. I had not taken care of my health."

I constantly had that tired out, depressed feeling, with sick headache, indigestion, insomnia, caused by the lack of constipation.

Our mild laxative has been of valuable assistance in keeping my system in a daily healthy condition.

CARTER'S LITTLE LIVER PILLS  
All druggists—5¢ and 75¢ red pills

## EVEREADY Radio Batteries

—they last longer

## Try It Yourself, Too!

You Can See Why a Layerbit Lasts Longer

We would hardly advise you to tear up a new EVEREADY Layerbit to find out why it lasts longer—but after you have finished one of these batteries, pull it apart!

You'll see how solid with current-making parts it is—how the carbon and zinc wires are away, giving the last bit of energy before your Layerbit finally "died out."

Layerbits make a great improvement over the old type of batteries with their round cell construction—and we know that you'll be satisfied that the last life and power given to your Layerbit is not due to a lucky accident or a mystery, but a certainty of long service and economy based on scientific construction.

Call upon us with every EVEREADY Layerbit Battery.

## POOL ANNOUNCES CHANGES IN STAFF

Several staff changes were announced at the headquarters of the Alberta Wheat Pool on Monday. W. H. Herbert, who has been with the contract department for nearly two years, has been transferred to the Canadian Wheat Pool staff at Winnipeg. N. P. Davison, who has been held service man in the Edmonton district in returning to the head office staff, and J. P. Watson, of Chinook, has been appointed to succeed Mr. Davison.

**Chinook United Church**  
Sunday, October 14  
Divine Services 7:30 p.m.  
Rev. A. G. Gay, Pastor

**Chinook Catholic Church**  
Service Second Sunday Every Month  
Mass at 8:00 a.m.

**Anglican Church**

The harvest Festival will be held in St. John's Church, Cereal on Sunday, Oct. 14th at 7:30 p.m.

"Come ye thankful people, come! Raise the song of harvest home!"  
Rev. A. W. Gollmor assisted by Mr. F. E. Torpy, Layrester, of Youngstown will be in charge of this service. The sermon will be preached by Mr. Torpy.

Rev. A. W. Gollmor,  
Rector-in-charge.

## CLASSIFIED ADS.

Lost—A Fawn Leather Jacket with brown wristbands between Mr. H. R. King's farm and Chinook. Finder please return same to Mr. King or leave at "Advance" office.

PUBLIC NOTICE  
TENDERS

Tenders are being solicited by the Myrtle S. D. No. 3772 for the removal of the Buildings situated on S.E. corner of the S. W. qr. of sec 1-28, west of the 4th Meridian to Myrtle School site situated on S. E. corner of sec 32-27 west of the 4th Meridian, a distance of five and one-half miles.

These buildings consist of a House 24 x 24 x 8½ ft, Square Roof Barn 14 x 30 x 8½ ft and one small building 10 x 12 x 6 ft.

All tenders must be in by October 25th. Lowest or any tender not necessarily accepted.

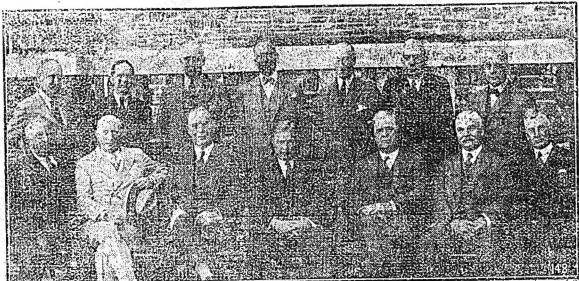

Successful tenderer must sign contract to deliver the buildings in a reasonable condition. A reasonable time will be given for the removal of buildings.

For further information apply to G. Hobson, Cyril Britton or C. B. Hittle, Trustees.

## Canadian Pacific Directors &amp; Eastern Financiers Inspect the West

From left to right, front row—F. W. Molson, director; Sir Charles Gordon, president Bank of Montreal; Sir Herbert Holt, director C.P.R. and president Royal Bank; E. W. Begley, chairman and president; N. W. Tilley, K.C., director; W. W. Chipman, president Ogilvie Milling Co. and director; Col. Henry Cockburn, president Great Western Lloyds Co. and director; Sir James Bowes, general manager Banque Canadienne Nationale; D. C. Coleman, vice-president Canadian Pacific western lines; Dr. W. W. Chipman, Montreal; James A. Richardson, director, Winnipeg; Ross H. McMaster, president Canada Steel and director; W. W. Blake White, director, Vancouver; Hon. Ernest White, president Gazette, Montreal. This group was photographed at Banff Springs hotel.

One of the most outstanding groups of eastern business men that ever visited western Canada together accompanied Mr. E. W. Begley, president of the Canadian Pacific's western lines. The party which was representative of the financial and industrial activities of all Canada left the east end of August and spent four weeks travelling about the country between Montreal and the Pacific coast.

The purpose of the tour was to become more conversant with western conditions and problems—and more particularly to the Peace River country, which they had never been to before.

The party returned east with optimistic views regarding the entire country visited.

"I have never seen the country looking better at least that night," said Mr. Begley on his return, "and in all my experience I have not previously found so much of a feeling of contentment in this country and its conditions as was observed in the cities and districts where we made stops and had an opportunity of talking things over with their representative citizens. More than ever am I impressed with the almost no man's land the桂坡's make to the north and that is especially around Cranbrook there are a challenge to the growing youth of the older parts of the country."

"We had an excellent opportunity of learning this," said Mr. Begley, "and I think that the Peace River country is much better off than it had not previously seen. As a result of that visit we have arranged to take over and operate the E.D. & B.C. Railway, which arrangement I believe will prove very greatly to the advantage of that country and the people who live there."

"It is a beautiful as well as a fertile country," continued Mr. Begley. "I can perhaps liken it best of all to some parts of old Ontario. It is a rolling country, in some parts of it there are great stretches of lakes and rivers. The soil is generally a rich black loam and highly productive, and although there is a steady movement of settlers into the area which we saw, no doubt increase in volume as it becomes better known. Its products are bound to be sold before the available land is all taken up. Our party took every advantage of the opportunity offered to see the country. We motored over three hundred and fifty miles of its excellent roads and travelled over two thousand miles of farm roads, many broken homesteads and in some cases well settled communities having every appearance of prosperity. In town and country alike we met with a cordial welcome and I think we will have many friends here in the future."

We travelled from the Peace River to the East towards the fur Northwest. We motored over the British Columbia border line as far as Revelstoke and as far north as Peace River Landing, and still feel we did not touch the edge of Canada's great north.

It is very difficult to say what the next few years will bring to the country, but we must conclude the fact that there is a new found belief abroad in the west of what has been previously experienced in the north and of the opportunities awaiting us. We hope that we shall very shortly be able to go to work on the task of putting the E.D. & B.C. Railway into better shape to serve the communities it reaches. Much money will have to be spent in order to bring it up to standard and it will also take some time."

## FARM FOR SALE

The Soldier Settlement Board of Canada offers for sale by public tender—

The North East Quarter of Section Thirty-two (32), in Township Twenty-nine (29), Range Eleven (11) West of the Fourth Meridian, containing 159 acres, more or less, reserving all mines and minerals.

Terms of sale are not less than 20 per cent of the purchase price in cash on acceptance of the tender, and the balance in 8 equal instalments, with interest at 6 per cent per annum on amortization plan.

Each tender must be accompanied by an accepted cheque for \$100. If tender is accepted, this sum will be credited to the purchase price of the land. If tender is not accepted the money will be returned to the tenderer.

Tenders will be opened at CALGARY, Alberta, on MONDAY, October 8th, 1928.

The highest or any tender not necessarily accepted. If the land is not sold on the date above mentioned, the Board will be prepared to receive offers until such time as it is finally disposed of.

Tenders should be in plain envelopes marked "Tender for the purchase of the N.E. 1/4 32-29-11-W, 4th Meridian".

Address tenders and enquiries to—

THE SOLDIER SETTLEMENT BOARD OF CANADA

Southam Building, CALGARY, Alberta.
